MAGENTA II

SUPERIORE

SERIES

THE CLASSIC HAS BEEN REBORN

superiore-series

Aurelia Magenta II might seem to be a rather small speaker but don't let its look deceive you. Magenta II is an exceptional loudspeaker whose dynamics, bass response and sonic credibility have been arousing delightment since its debut.

Critics around the world have as well noticed these things. Magenta's second coming is the result of a long R&D period – Magenta sounds now better than ever.

LOVE AT FIRST SIGHT

We use our 2nd generation Energy Controlling Waveguide-technology (ECW) in the tweeter system. The ECW seamlessly adapts the tweeter to the bass unit at the cross frequency. The ECW-technology guarantees that the transition from bass to treble occurs smoothly and that the phase behavior is linear.

The result is a pleasant and uniform sound with a natural and three-dimensional soundstage. It is not a coincidence that everybody seems to fall in love with Aurelia Magenta.
